Sherwood has been contacted by *The Royal College of General Practitioners (GPs)* to challenge us to find out about the Circulatory System, and to create explanation posters and short films to display/play in their surgery waiting rooms.

They would really appreciate our help, informing the public about how the heart functions and would also like us to make links to health.

General Practitioners

P

Purpose

What is the purpose of your writing?

A

Audience

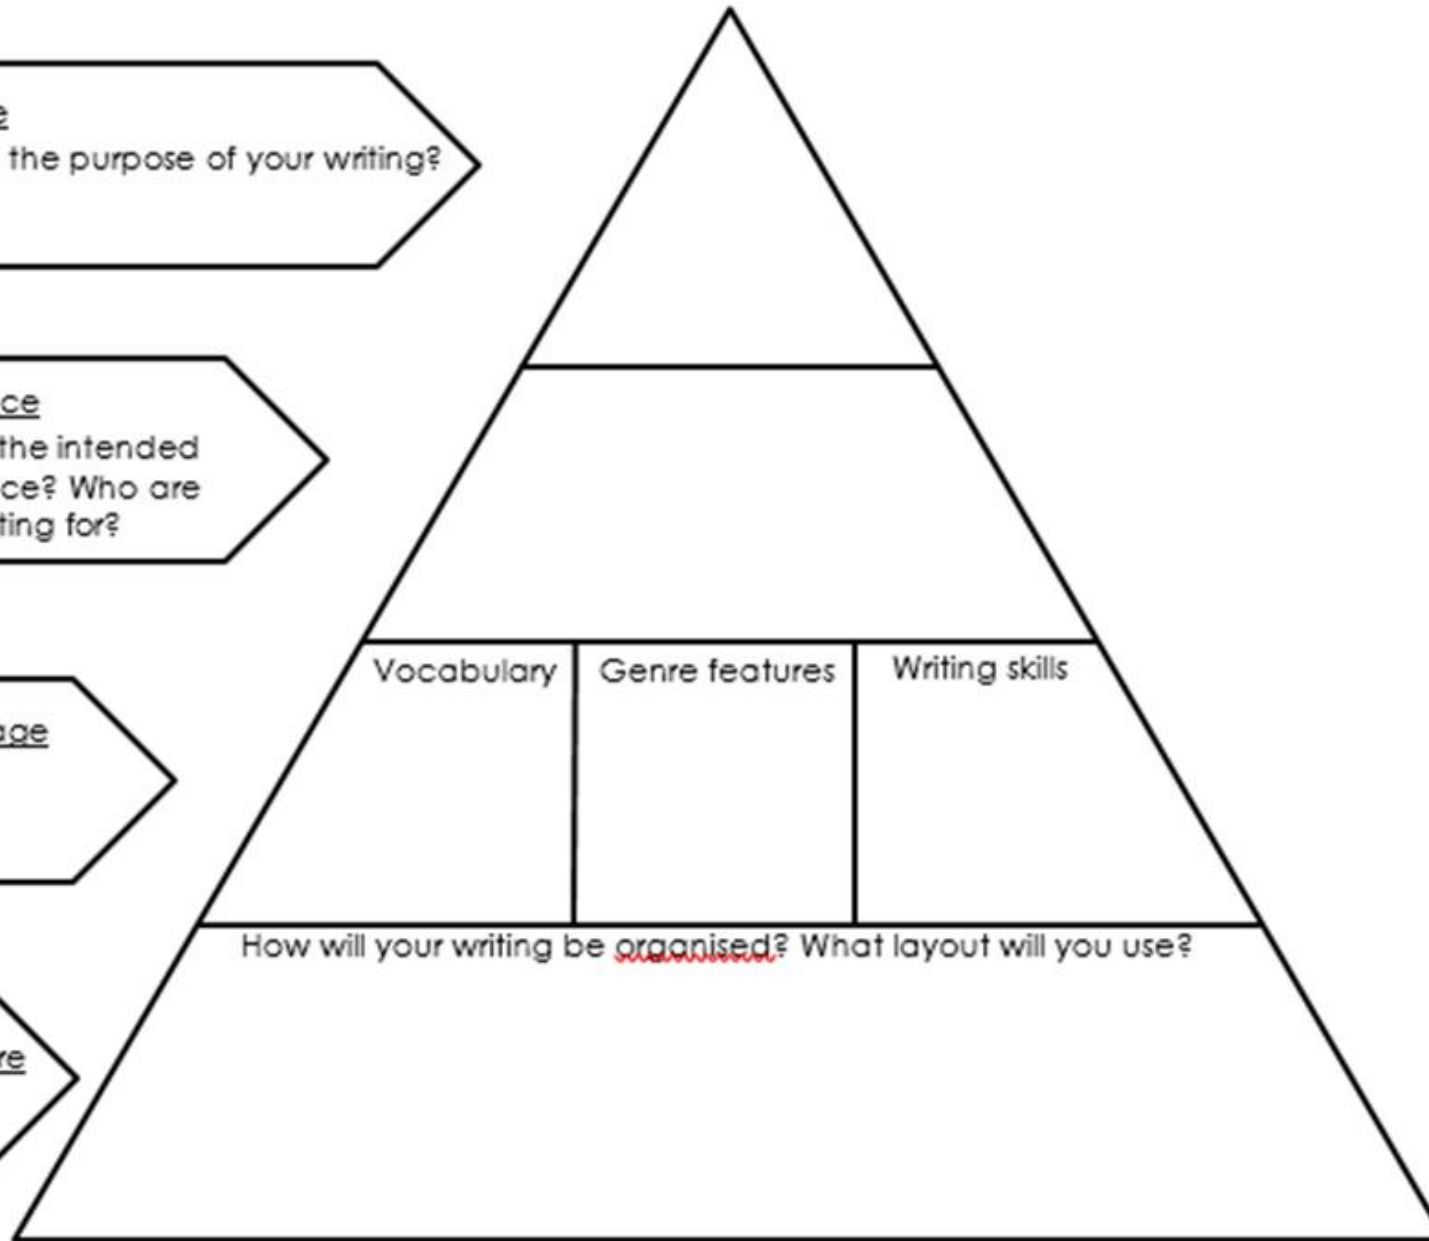

Who is the intended audience? Who are you writing for?

L

Language Toolkit

S

Structure

Before we start writing our posters, we need to think about PALS.

Watch Miss Terrell's tutorial.

The Circulatory System Key Vocabulary

heart	organ	ventricle
lungs	muscle(s)	atrium
vein(s)	oxygen	chamber
artery (<u>ies</u>)	oxygenated	circulatory
blood	carbon dioxide	cardiovascular
blood vessels	breathe	

What sections do we need on our poster?

(Structure)

Possible sub-headings and areas to be researched:

- Can you feel your heart? (look back at your work on the pulse)
- The structure of your heart. (Research more today)
- The circulatory system. (Talk for Writing)
- Heart healthy. (Research more today)

Today, you will need to find out information on the structure of the heart and keeping your heart healthy, and jot down any fun facts that you spot.

Websites...

- The structure of your heart

Draft your paragraphs...

- Using PALS, draft your paragraphs.
- Make sure you are formal in style, but use some informal and persuasive phrases to add interest and engage the reader.
- Don't forget to use your key vocabulary and Talk for Writing.
- You will need a general introductory paragraph (draw the reader in with an amazing fact), then these sections:
 - Can you feel your heart?
 - The structure of your heart
 - The circulatory system
 - Heart healthy

We will create the final poster tomorrow – more to follow!
