

# SHERWOOD PRIMARY SCHOOL

## YEAR 5 REMOTE LEARNING PLAN

Wednesday 24<sup>th</sup> February 2021

### CORE LEARNING TASK FOR ENGLISH

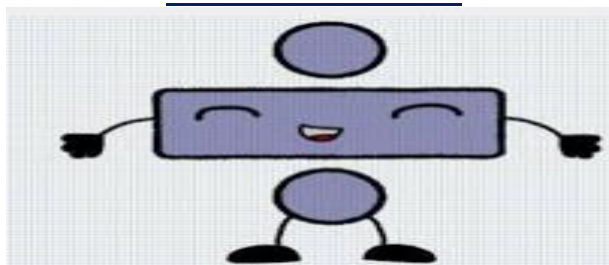

Today, we will be revisiting Maia's journey down the Amazon and learning a section using our Talk for Writing techniques. This will then help us to write our own version for our setting description, later in the week.

Begin by watching Mrs Sheppard's video where she reads the passage and looks at some key vocabulary. Then watch Mrs Sheppard's second video and then, using the text provided on the website, learn the passage by heart. You can use our actions or make up your own! Send us a video of your performance.

Finally, listen to [chapter four and five](#) of the novel to see what happens next.

### CORE LEARNING TASK FOR MATHEMATICS

Continuing our theme for the week we are going to look at using our knowledge of multiplication and division, especially related division facts to solve more problems mentally.

Firstly though, we are going to start with converting between mixed numbers and improper fractions. Today we are reversing the process and going from mixed numbers to improper fractions. Watch the video for hints.

Next we are going to look at how to solve number calculations using know facts such as knowing that  $6 \times 6 = 36$  then we could derive the solutions for questions such as  $6000 \div 60$  and  $36000 \div 600$ . Continue to watch the video before attempting as many questions as the hour allows.

God luck!

### KEY VOCABULARY

**Our spelling focus this week is Morphology and Etymology.**

Today you will be provided with some root words. We would like you to first of all, identify as many words as you can that use these roots and then, from this, try and figure out what the root means. Watch Mrs Sheppard's video where she shows you how to make a start.

### WIDER CURRICULUM TASK

#### Geography

Starting our new topic for this term today, we are going to continue the theme of the Amazon in Geography. To begin with let us know what you already know about the rainforest. Watch the introduction video to South America here

<https://www.oddizzi.com/teachers/explore-the-world/places/south-america/>

before following the tasks found on the page. There is lots of map work today so use any resources at home and online searches to help complete the activities. Follow the instruction throughout the video and enjoy becoming Geographers.

#### Guided Reading

Please log on to the activity section on SeeSaw to see your Guided Reading tasks.
