QR Codes

You may have noticed that your child has started to upload their own work onto Seesaw. We have taught the children how to use the iPads in our classroom to scan a QR code. This takes them to their journal where they can then take a photograph and upload it.

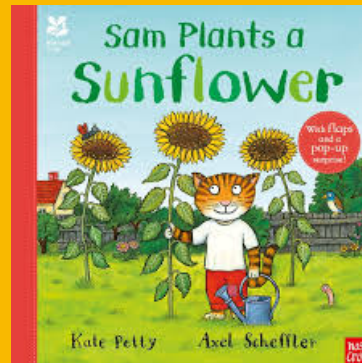

Why not ask your child to help you when you are uploading your next Seesaw post!

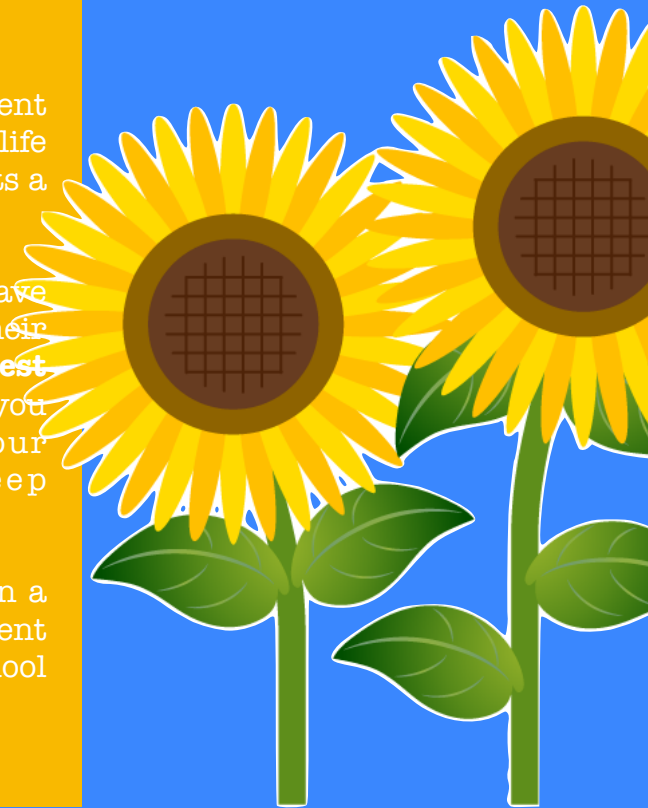

Sunshine and sunflowers!

We have enjoyed the warmer weather this week and have spent lots of time outdoors. We have been learning all about the life cycle of a sunflower and enjoyed reading the story, 'Sam plants a sunflower'.

The children have all decorated a little flower pot and have planted their own sunflower seed. They will be bringing their sunflower home to grow and we are going to launch our **tallest sunflower competition!** Make sure you share your photographs of your sunflower on Seesaw and keep measuring to see how tall they grow!

In forest school the children went on a scavenger hunt looking for the different trees and plants growing in our school grounds. It was lots of fun!

Homework

In our maths this week we have been learning how to double quantities of objects. Here is an online game you could play to help practise learning your double facts.

Next Week

We are going to continue to think about planting and growing next week but our focus will be on vegetables. We will be looking at the food we eat and where it comes from.

Don't forget that school is closed on Monday!
